Motivated and detail-oriented Full Stack Developer student with hands-on experience in building responsive web applications through academic projects and personal work. Skilled in front-end technologies like HTML, CSS. Developed pattern-generating programs in C using nested loops (pyramids, diamonds, number patterns). Created custom functions for array-based operations like matrix addition and rotation. Eager to contribute technical skills and a strong problem-solving mindset to a dynamic development team while continuing to grow as a developer.
